CD (Music)

-9 LUFS

Vinyl

Nothing flatlined

Leave headroom

Remove severe limiters and compression on the master channel - we need the headroom! (-3dB peaks are fine)

These are your settings on the left that you are aiming for.

Our settings

Depending on your desired formats - we'll be working to these settings.

Please let us know if you require anything different to these current standards

When sending to vinyl pressing plants, we will clearly label SIDE A 1.wav , SIDE A 2.wav, etc.. but make sure you've given us all of this data and are sure the material fits on each side of the vinyl.
